## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U. S. C. 121:

- I. Claims 1-19, drawn to a method of treating disorders associated with radical depolarization of excitable membranes such as cardiac ischemia, cerebral ischemia, asthma or ocular ischemia by activating a K<sub>ATP</sub> channel which comprises administering an active agent selected from the group consisting of a compound of SEQ ID NO:1 and an analog thereof, classified in class 514, subclass 2, and class 530, subclass 300.

Applicant is required to select one amino acid sequence cited in claim 1 or 10, and identified with a "SEQ ID NO:". A peptide having any change of amino acid residue at any one or more positions is a distinct peptide. This is not species election.

2. The inventions are distinct, each from the other because of the following reasons:

The claims are directed to methods of treating disorders associated with radical depolarization of excitable membranes using distinct peptides. Each peptide is patentably distinct because each amino acid sequence has different chemical and physical properties, and produces different effect in the method of treatment. Thus, methods of using distinct peptides are also considered patentably distinct.

Because these inventions are distinct for the reasons given above, and because Inventions require different searches but are not co-extensive, examination of these distinct inventions would pose a serious burden on the examiner and therefore restriction for examination purposes as indicated is proper.

Art Unit: 1653

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

A telephone call was made to Jeffrey Ihnen on July 12, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i). Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chih-Min Kam whose telephone number is (571) 272-0948. The examiner can normally be reached on 8.00-4:30, Mon-Fri.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jon Weber can be reached at 571-272-0925. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
